Scientific Lectures (Apply timetable of scientific lecture)

	Title	Lecture date	Credit hours	Supervisor's signature
1	Embryology: Development of urinary system : kidney and ureter Cloacal development and its derivatives: bladder , urethra Development of genital system :male genital system : testis , prostate , duct System and external genitalia. Anatomy: Surgical anatomy of retroperitoneum, adrenal, kidney and ureter: a- Retroperitoneum: - Boundaries, fascia, muscles of the posterior abdominal wall, diaphragm. - Great vesseles. - Nervous system structures. b- Adrenal glands. c- Kidneys. d- Ureter. Anatomy of the lower urinary tract and male genitalia: a- Anterior abdominal wall. b- Soft tissue of the pelvis. c- Pelvic circulation. d- Pelvic innervations. e- Pelvic viscera: - Rectum. – Bladder, prostate, male urethra. - Female genital organs. – Female urethra. f- Perineum. g- Male external genitalia (scrotum and penis).			
2	Pathology: Oncology : 1- Bladder tumours.Urothelial and non urothelialtumours. 2- Renal tumours:Benign and malignant renal tumours. 3- Upper urothelialtumours.umours. 4- Testicular tumours. 5- Childhood tumours: a- Childhood renal tumours.b- Neuroblastoma. c- Rhabdomyosarcoma.d- Testicular tumours. 6- Adrenal tumours(incidentaloma). 7- Prostate cancers. 8- Penile cancers. BPH Infection and inflammations: 1- Renal infections: - Non specific: acute and chronic infections. - Specific: T.B, malakoplakia, hyadatid disease. 2- Prostatitis. 3- Orchitis and epididymitis. 4- Urethritis 5- Genital infections and ulcers. 6- Cystitis:chronic cystitis, interstitial cystitis, contracted bladder. 7- Genitourinary T.B. 8- Bilharziasis of the urinary system. Cystic kidney disease: Genetic and non genetic cystic diseases.

Scientific Lectures(Apply timetable of scientific lecture)

Date	Title	Credit hours	supervisor	Supervisor's signature
	<u>Obstructive uropathy:</u> Pathophysiology of urinary tract obstruction Management of urinary tract obstruction			
	<u>Pediatric urology:</u> Normal Development of the Urogenital System Evaluation of pediatric urology patient Inflammation and infection of pediatric genitourinary tract Renal dysgenesis , renal cystic disease Anomalies and surgeries for pelviureteric junction obstruction Ectopic ureter , ureterocele and other anomalies of the ureter Reflux and megaureter Prune belly syndrome Evaluation and management of Extrophy-epispadias complex Hypospadias Voiding dysfunction in children Pediatric urologic oncology Pediatric endourology and laparoscopy Pediatric genitourinary trauma Abnormalities of scrotum and testes Sexual differentiation normal and abnormal.			
	<u>Voiding dysfunction and urodynamics:</u> Pathophysiology and classification of voiding dysfunction Urodynamic evaluation of voiding dysfunction Lower urinary tract dysfunction in neurologic injury			
	<u>Laparoscopy in urology:</u> Basics of laproscopic surgery Laparoscopy in reconstructive urology Laparoscopy in urologic oncology Laparoscopy in adrenal pathology			
	<u>Reconstructive urology :</u> Choice of urinary diversion. Types of urinary diversions Evaluation of stricture urethra Management of stricture urethra.			

Signature of Fellow:
