

Seminars 2023

Topics

1.	The Effect of COVID-19 Co-infection with Malaria on Pregnancy Outcomes
2.	Blood-Brain Barrier in Cerebral Malaria
3.	Invasion of CNS by <i>Trypanosoma brucei</i>
4.	Applications of nanobodies in helminth infections
5.	Nosocomial parasitic infections
6.	Past and future trends of <i>Cryptosporidium</i>
7.	Impact of Human Activities on Fasciolosis Transmission
8.	Host-targeted Therapies for Malaria
9.	Neurological and Ocular Fascioliasis in Humans
10.	Extracellular Interactions between Plasmodium Sporozoites and Host Cells Required for Infection
11.	Protection against malaria by abnormalities in red cell surface antigens and cytoskeletal proteins
12.	Repurposing of antiparasitic drugs
13.	Impact of nanoparticles on protozoan infections
14.	The role of medical Parasitology in hospitals infection control
15.	Imported parasitic diseases
16.	The Parasitophorous Vacuolar Membrane of Malaria Parasites
17.	Inflammasome Activation in Response to Intracellular Protozoan Parasites

18.	Mosquito Host-Seeking Regulation
19.	Mobile Phone Devices and Handheld Microscopes as Diagnostic Platforms for Malaria and Neglected Tropical Diseases
20.	Impact of Human Activities on Fasciolosis Transmission
21.	Transgenic mosquitoes
22.	Malaria Parasite Proteins and Their Role in Alteration of the Structure and Function of Red Blood Cells
23.	Cerebral Toxoplasmosis
24.	Trichomonas vaginalis Pathobiology
25.	Arthropods vaccines
26.	Protection against malaria by abnormalities in red cell surface antigens and cytoskeletal proteins
27.	Neorickettsial Endosymbionts of the Digenea
28.	Neurotoxocariasis
